

# Jikoprojektet i Kenya

## Hjälp-till-självhjälp på riktigt

- 
- A woman wearing a red and blue dress is cooking over a fire in a traditional setting. She is holding a large, round, brown object, possibly a pot or a piece of wood, over the fire. The background is dark and appears to be the interior of a traditional building with wooden poles.
- 32% av befolkningen i Kenyas städer lagar mat med fasta bränslen
  - På landsbygden använder över 95% fasta bränslen för matlagning
  - Mer än 21 miljoner människor lider av hälsoproblem som orsakas av detta. Det är den främsta orsaken till för tidig död (4900 barn varje år!)
  - Enligt WHO motsvarar matlagning på en trestenseld att röka 1-2 cigarettpaket om dagen!

- 
- A photograph of a woman sitting on the ground in front of a makeshift shack. The shack's walls are covered in newspaper and plastic. The woman is wearing a purple shawl and a colorful patterned skirt. To her right is a yellow water container and a small wooden stool. The background shows trees and a clear sky.
- Att göra träkol är en ineffektiv process som är skadlig för miljön. Bara 10-15 % av träet blir kol
  - Trädkövlingen orsakar jorderosion
  - Regeringen har lagt restriktioner för att göra och sälja kol, vilket lett till höjda priser
  - I städerna i Kenya spenderar nästan 1 miljon hushåll ca 10 kr per dag, eller 15-20% av hushållens intäkter, på kol för matlagning.

# Banning charcoal isn't the way to go. Kenya should make it sustainable

EcoZoom is a social enterprise and certified B Corporation that makes clean burning, portable wood and charcoal powered cookstoves, and solar powered lighting solutions. We believe cooking should be healthy, efficient and eco-friendly for everyone, regardless of socio-

Billions of people in developing countries do not have access to electricity and gas. They cook with biomass and often on unhealthy and inefficient fires. Women spend hours daily gathering fuel, and families can spend up to 30% of their monthly income on fuel, forcing them into

EcoZoom cookstoves and solar products offer a reliable and affordable solution! Our solar products completely eliminate the need for kerosene. We are currently selling our stoves in countries like Kenya, Tanzania, Uganda, Nigeria, Ghana, Somalia and South Africa. Other countries include

**Minskar utsläppen med 70 procent**

**Mindre spridningsvärme**

**Kortare tid för matlagning**

**Mindre risk för brännskador**

**Spar minst 100 kr per månad för en  
normalstor familj**

**Varje spis räddar uppskattningsvis  
40 träd under en 5-årsperiod**

## **In Her Words: Women in Kenya share how cleaner cooking solutions can transform lives**

While cooking with cleaner, more modern stoves and fuels is not a silver bullet to the challenges that many women face, it can be an enormous help. Clean cooking not only contributes to gender equality, it also supports other Sustainable Development Goals, such as good health and well-being, affordable and clean energy, and climate action.

## Ekonomi

En spis kostar 400 kr

Varje spis spar 100 kr/mån

Efter 4 månader är spisen  
betald

## Besparing:

90 spisar = 9 000 kr/mån

1 år = 108 000 kronor

5 år = 540 000 kronor

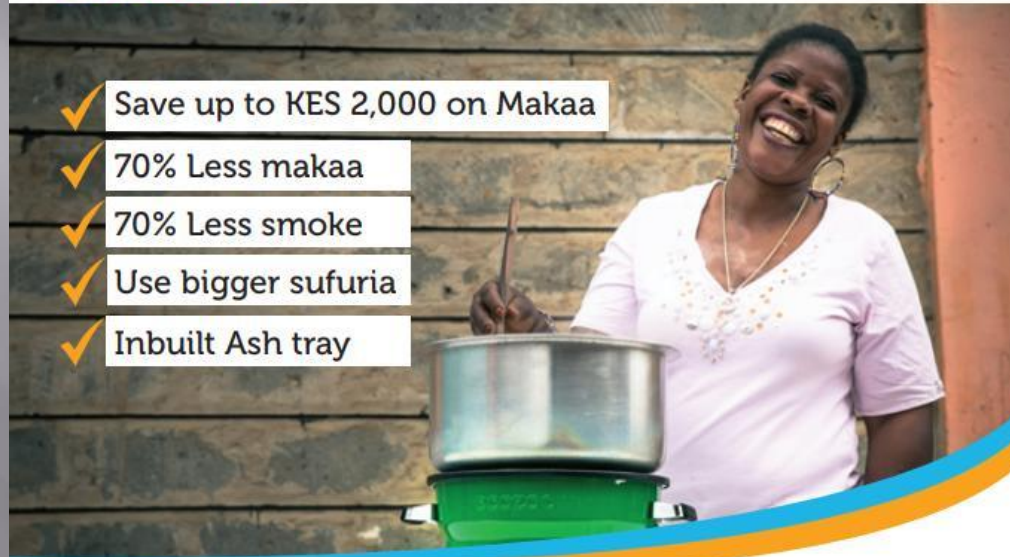

+

Räddat en skog på 3600 träd

# Jiko Bora "Mama Yao"

• Makaa kidogo • Pika na Sufuria Kubwa •

- ✓ Save up to KES 2,000 on Makaa
- ✓ 70% Less makaa
- ✓ 70% Less smoke
- ✓ Use bigger sufuria
- ✓ Inbuilt Ash tray

9 april kl. 21:08 · 🌐

Elinah from Voi (in Kenya) started a small shop where she sells vegetables, and EcoZoom jikos! Jiko means stove in Kiswahili. Thank you Jan Ake Thorell for the photos.
